Dear Sir or Madam,

Study on 'Living in England Today'

City University is conducting an important national study about various issues affecting people living in England today. Similar studies are taking place across Europe so that we can find out the similarities and differences between people living in different countries. In order to do this, it is extremely important that we speak to a cross section of the population.

Your address has been selected at random from the Post Office's national list of addresses to form part of a sample that represents the population as a whole. Now that your address has been selected we cannot replace you with another household. We would like to interview **one person aged 15 or over** from this household who will be selected by the interviewer. You may want to show this letter to other people in your household just in case they are selected to take part. We have asked a research organisation, *BMRB Social Research*, to conduct the interviews on our behalf.

To thank them for their time, BMRB Social Research will give the person interviewed £10 in cash.

An interviewer _____ calling on behalf of *BMRB Social Research* will visit you in the near future. He or she will be able to explain more about the study. Any information that you give to the interviewer will be kept completely confidential, in accordance with the Data Protection Act and used for statistical purposes only.

If you would like to know more about the study or wish to get a message to an interviewer who has already contacted you, please call Barry Fong at *BMRB Social Research* on 020 8433 4390 during working hours (Monday to Friday: 9.30am-5.30pm), or e-mail barry.fong@bmr.co.uk. A leaflet has also been enclosed which provides further information on this study.

This study is funded by the Economic and Social Research Council (ESRC). The ESRC is the UK's leading research and training agency addressing economic and social concerns. The ESRC aims to provide high quality research on issues of importance to business, the public sector and the Government.

I hope that you are able to take part. Those who have taken part so far have found it an interesting and enjoyable study. Thank you in advance for your help.

Yours faithfully,

Professor Roger Jowell
Director, Centre for Comparative Social Surveys
City University
